

ID	Windows Server 2008 – NEW!	Days	Aug	Sept	Oct	Nov	Dec	Price	Prereq	Exam(s)
6064	Implementing and Managing a Windows Mobile Infrastructure This course provides in-depth knowledge on designing, configuring, implementing security, and managing Windows Mobile Infrastructure. Most students will have basic knowledge about Exchange Server 2007 and will have managed enterprise-level Exchange Server organizations. Students are expected to be new to participating in designing Windows Mobile solutions for Exchange Server 2007 or be planning to design a Windows Mobile 6.0 infrastructure for Exchange Server 2007 in the near future. Students may have done some mobility deployment for Exchange Server 2003 but want to learn how to deploy Windows Mobile 6 in the Exchange Server 2007 environment.	3			12-14			\$1195		
6416	Updating Your Network Infrastructure and Active Directory Technology Skills to Windows Server 2008 This course provides students with an understanding of Active Directory technology in Windows Server 2008. This course is intended to allow individuals who already have experience with Active Directory to upgrade their skills for Windows Server 2008. This course is based on an interim build of Windows Server 2008. This course is intended for IT Professionals experienced on the technologies included in Windows Server 2000 and Windows Server 2003, and who hold an MCSE or MCSA certification and/or equivalent knowledge.	5	31 – Sept 4			2-6		\$1995		
6417	Updating your Application Platform Technology Skills to Windows Server 2008 This course provides students with an understanding of Applications Platform technology in Windows Server 2008. This course is intended to allow individuals who already have experience with Applications Platform technologies to upgrade their skills for Windows Server 2008. This course is based on an interim build of Windows Server 2008.	3	17-19			9-11		\$1195		
6418	Deploying Windows Server 2008 This course provides students with an understanding of migrating and deploying Windows Server 2008, including installation, configuration, and upgrading. Special emphasis is given to upgrading common server configurations and using the Windows Server Deployment Solution Accelerator.	3		8-10		23-25		\$1195		
6419	Configuring, Managing, and Maintaining Windows Server 2008 Servers This course combines five days worth of training content from the Network Infrastructure Technology Specialist, Active Directory Technology Specialist, and IT Professional Server Administrator courses of Windows Server 2008. This course is intended for Windows Server administrators who operate Windows Servers on a daily basis and want to learn the skills for configuring, managing, and maintaining the core technical areas of Windows Server 2008.	5		14-18		16-20		\$1995		
6421	Configuring and Troubleshooting a Windows Server 2008 Network Infrastructure This course provides students with the knowledge and skills to configure and troubleshoot a Windows Server 2008 network infrastructure. Students will learn to implement and configure secure network access and implement fault tolerant storage technologies. Students will gain an understanding of the network technologies most commonly used with Windows Server 2008 and IP-enabled networks. Students will also learn how to secure servers and maintain update compliance.	5		28 – Oct 2		30 – Dec 4		\$1995		
6424	Fundamentals of Windows Server 2008 Active Directory This course provides Active Directory Technology Specialists an introduction to Active Directory server roles in Windows Server 2008. The course is intended for entry level students who want to get familiar with the Active Directory server roles and their basic functionality.	3			5-7		21-23	\$1195		
6425	Configuring Windows Server 2008 Active Directory Domain Services This course provides to teach Active Directory Technology Specialists with the knowledge and skills to configure Active Directory Domain Services in a distributed environment, implement Group Policies, perform backup and restore, and monitor and troubleshoot Active Directory related issues.	5		21-25			7-11	\$1995		
6426	Configuring and Troubleshooting Identity and Access Solutions with Windows Server 2008 Active Directory This three-day instructor-led course provides the knowledge and skills that IT Professionals need to configure identity and access solutions with Windows Server 2008 Active Directory.	3			12-14		21-23	\$1195

ID	Windows Server 2008 – NEW!	Days	Aug	Sept	Oct	Nov	Dec	Price	Prereq	Exam(s)
6427	Configuring IIS 7.0 in Windows Server 2008 This course the students will learn to install, configure, maintain, and troubleshoot an Internet Information Services 7.0 Web Server in Windows Server 2008. The primary audience for this course is individuals who want to become a Web Server Administrator in an enterprise environment. Also, individuals who are assuming a new role requiring skills to manage content served by an IIS 7.0 Web Server over an intranet, extranet, and internet would be interested in this course.	3	17-19		19-21		14-16	\$1195		
6428	Configuring and Troubleshooting Windows Server 2008 Terminal Services This course provides students with the knowledge and skills to configure, manage, monitor, and troubleshoot a Terminal Services (TS) environment. The course focuses on configuring of TS core functionality, licensing, Gateway, and Web Access. This is the second course in the Windows Application Platform Services Technology Specialists Who Use Windows Server 2008 curriculum and will introduce the students to the Windows 2008 Terminal Services.	2			22-23		17-18	\$795		
6429	Configuring and Managing Windows Media Services for Windows Server 2008 This course provides students with the knowledge and skills to configure and manage Windows Media Services. This course is intended for existing Windows Media Services (WMS) Streaming Media Services Technology Specialists and other Technology Specialists interested in expanding their job skills to include WMS.	2	3-4			2-3		\$795		
6430	Planning and Administering Windows Server 2008 Servers This course provides students with the knowledge and skills to implement, monitor, and maintain Windows Server 2008 servers. This course is intended for entry level server administrators or IT professionals who are interested in becoming server administrators as the next step in their career.	5	24-28		26-30			\$1995		
6431	Managing and Maintaining Windows Server 2008 Network Infrastructure Servers This course provides students with the knowledge and skills to manage and maintain Windows Server 2008 network infrastructure servers. The course focuses on creating a plan for managing the server lifecycle, developing and evaluating baselines for monitoring and managing server roles, and analyzing the implementation and configuration of several different server roles for Windows Server 2008. The course will also focus on analyzing and maintaining network server security.	3				4-6		\$1195		
6435	Designing a Windows Server 2008 Network Infrastructure This five-day course will provide students with an understanding of how to design a Windows Server 2008 Network Infrastructure that meets business and technical requirements for network services.	5			19-23			\$1995		
6436	Designing a Windows Server 2008 Active Directory Infrastructure and Services Students will learn how to design an Active Directory Infrastructure in Windows Server 2008. Students will learn how to design Active Directory forests, domain infrastructure, sites and replication, administrative structures, group policies, and Public Key Infrastructures. Students will also learn how to design for security, high availability, disaster recovery, and migrations.	5	10-14			16-20		\$1995		
6437	Designing a Windows Server 2008 Application Infrastructure This course will prepare IT professionals for the role of Enterprise Administrator. Students will learn how to design application infrastructure solutions based on Windows Server 2008 to meet varying business and technical requirements.	3		8-10		23-25		\$1195		
6451	Planning, Deploying and Managing Microsoft Systems Center Configuration Manager 2007 Provides students with the knowledge and skills to plan, deploy, and manage Configuration Manager 2007. The course focuses on planning and deploying sites and clients, configuring software distribution, deploying operating systems, and managing software updates. It also focuses on remote tools and managing mobile devices.	5	17-21		12-16		7-11	\$1995

ID	Security, Forensics and Wireless	Days	Aug	Sept	Oct	Nov	Dec	Price	Prereq	Exam(s)
CEH	Ethical Hacking and Countermeasures This class will immerse the student into an interactive environment where they will be shown how to scan, test, hack and secure their own systems. The lab intensive environment gives each student in-depth knowledge and practical experience with the current essential security systems. Students will begin by understanding how perimeter defenses work and then be lead into scanning and attacking their own networks, no real network is harmed. Students then learn how intruders escalate privileges and what steps can be taken to secure a system. Students will also learn about Intrusion Detection, Policy Creation, Social Engineering, DDoS Attacks, Buffer Overflows and Virus Creation. When a student leaves this intensive 5 day class they will have hands on understanding and experience in Ethical Hacking.	5	3-7 Chi.		5-9 Clev.	2-6 Cinci.	7-11 Chi.	\$2495		312-50
CHF1	Computer Hacking Forensic Investigator The CHF1 course will give participants the necessary skills to identify an intruder's footprints and to properly gather the necessary evidence to prosecute. Many of today's top tools of the forensic trade will be taught during this course, including software, hardware & specialized techniques. The need for businesses to become more efficient and integrated with one another has given way to a new type of "cyber-criminal." It is no longer a matter of "will your organization be comprised (hacked)?" but, rather, "when?" Today's battles between corporations, governments, and countries are no longer fought only in the typical arenas of boardrooms or battlefields using physical force. Now the battlefield starts in the technical realm, which ties into every facet of modern day life. If your organization requires the knowledge or skills to identify, track, and prosecute the cyber-criminal, then this is the course for you.	5		20-22 Hacker Halted Event Miami, Florida				\$2495		312-49
ID	Vista	Days	Aug	Sept	Oct	Nov	Dec	Price	Prereq	Exam(s)
5105	Deploy Windows Vista Business Desktops Provides students with the knowledge and skills to successfully deploy Microsoft Windows Vista business desktops throughout their organization. Students are introduced to the deployment life cycle, which consists of planning for the deployment, building and customizing the deployment method, and then implementing the actual deployment. Students are introduced to the tools and guidance to be used throughout various stages of the deployment life cycle.	3			26-28			\$795		
5115	Install & Configure Windows Vista OS Provides students with the knowledge and skills to install and configure Windows Vista desktops. It will focus on four main areas: installing, securing, networking, and browsing. By the end of the course, the student will have installed and configured a Windows Vista desktop that is secure, on the network, and ready for browsing. Serves as the entry point for other Windows Vista Technology Specialist courses	3	5-7			16-18		\$1195		
5116	Configuring Windows Vista Mobile Computing and Applications This course provides students with the knowledge and skills to successfully configure mobile computers and applications that run Windows Vista. It will also provide them with the knowledge and skills necessary to ensure successful configuration of the IT Pro tools and productivity applications that ship with Windows Vista. Students will focus on six main areas: maintenance and optimization tools, media applications, productivity applications, notebook computers, mobile devices, and Tablet PCs.	2				19-20		\$795		
5118	Maintaining and Troubleshooting Windows Vista Computers This course provides students with the knowledge and skills to successfully maintain and troubleshoot Windows Vista computers. It will provide them with the knowledge and skills necessary to identify technical problems that can occur in organizations client computers. The course will focus on five main troubleshooting areas: Operating system, hardware, networking, security, applications.	3		21-23				\$1195		
ID	Windows 7 – NEW!	Days	Aug	Sept	Oct	Nov	Dec	Price	Prereq	Exam(s)
6292	Installing and Configuring Windows 7 Client This course is intended for IT professionals who are interested in expanding their knowledge base and technical skills about Windows 7 Client. In this course, student learn how to insall, upgrade, and migrate to Windows 7 client. Students then configure Windows 7 client for network connectdivity, security, maintenance, and mobile computing.	3				9-11		\$1195

ID	SQL Server 2008 – NEW!	Days	Aug	Sept	Oct	Nov	Dec	Price	Prereq	Exam
2778	Writing Queries Using Microsoft SQL Server 2008 Transact – SQL This course provides students with the technical skills required to write basic Transact-SQL queries for Microsoft SQL Server 2008. This course is intended for SQL Server database administrators, implementers, system engineers, and developers who are responsible for writing queries.	3	26-28		19-21		21-23	\$1195		
6158	Updating Your SQL Server 2005 Skills to SQL Server 2008 This three-day instructor-led course provides students with the knowledge and skills to upgrade their SQL Server 2005 skills to SQL Server 2008.	3		14-16		16-18		\$1195		
6231	Maintaining a Microsoft SQL Server 2008 Database This five-day instructor-led course provides students with the knowledge and skills to maintain a Microsoft SQL Server 2008 database. The course focuses on teaching individuals how to use SQL Server 2008 product features and tools related to maintaining a database.	5		28 – Oct 1		30 – Dec 4		\$1995		
6232	Implementing a Microsoft SQL Server 2008 Database This five-day instructor-led course provides students with the knowledge and skills to implement a Microsoft SQL Server 2008 database. The course focuses on teaching individuals how to use SQL Server 2008 product features and tools related to implementing a database.	5	3-7		5-9		14-18	\$1995		
6234	Implementing and Maintaining Microsoft SQL Server 2008 Analysis Services This three-day instructor-led course teaches students how to implement an Analysis Services solution in an organization. The course discusses how to use the Analysis Services development tools to create an Analysis Services database and an OLAP cube, and how to use the Analysis Services management and administrative tools to manage an Analysis Services solution.	3	31 – Sept 2		26-28			\$1195		
6235	Implementing and Maintaining Microsoft SQL Server 2008 Integration Services This three-day instructor-led course teaches students how to implement an Integration Services solution in an organization. The course discusses how to develop, deploy, and manage Integration Services packages.	3		21-23		23-25		\$1195		
6236	Implementing and Maintaining Microsoft SQL Server 2008 Reporting Services This course teaches students how to implement a Reporting Services solution in an organization. The course discusses how to use the Reporting Services development tools to create reports, and how to use the Reporting Services management and administrative tools to manage a Reporting Services solution.	3	24-26		19-21			\$1195		
ID	SQL Server 2005	Days	Aug	Sept	Oct	Nov	Dec	Price	Prereq	Exam
2779	Implementing a MS SQL Server 2005 Database Provides you with product knowledge and skills needed to implement a Microsoft SQL Server 2005 database. The course focuses on teaching individuals how to use SQL Server 2005 product features and tools related to implementing a database.	5	24-28			9-13		\$1995	2778	70-431
2780	Maintaining a MS SQL Server 2005 Database Provides you with product knowledge and skills needed to maintain a MS SQL Server 2005 database. The course focuses on teaching you how to use SQL Server 2005 features and tools to maintain a database.	5	17-21		26-30			\$1995	2778 2779	70-431
2791	Implementing and Maintaining MS SQL Server 2005 Analysis Services This three-day instructor-led course teaches students how to implement an Analysis Services solution in an organization. The course discusses how to use the Analysis Services development tools to create an Analysis Services database and an OLAP cube, and how to use the Analysis Services management and administrative tools to manage an Analysis Services solution.	3		14-16			14-16	\$1195		
2792	Implementing and Maintaining MS SQL Server 2005 Integration Services This course teaches students how to implement an Integration Services solution in an organization. The course discusses how to develop, deploy, and manage Integration Services packages.	3		8-10		2-4		\$1195		
2793	Implementing and Maintaining MS SQL Server 2005 Reporting Services This course teaches students how to implement a Reporting Services solution in an organization. The course discusses how to use the Reporting Services development tools to create reports, and how to use the Reporting Services management and administrative tools to manage a Reporting Services solution.	3	10-12		12-14		7-9	\$1195

ID	Visual Studio 2008 – NEW!	Days	Aug	Sept	Oct	Nov	Dec	Price	Prereq	Exam(s)
2310	Developing Web Applications Using Microsoft Visual Studio 2008 This course will teach introductory-level web developers the fundamentals of web application development and best practices for Microsoft web development technologies, including ASP.NET 3.5, ASP.NET AJAX Extensions, and Silverlight. This course focuses on using the Microsoft Visual Studio 2008 development environment and the Microsoft .NET Framework 3.5 to create a web application that delivers dynamic content to a website.	5	31 – Sept 4			2-6		\$1995		
6214	Effective Team Development Using Microsoft Visual Studio Team System This three-day instructor-led course provides students with the knowledge and skills to manage source control management, a configurable build process, tools that aid in test driven development, and process workflow all integrated directly into Visual Studio 2008. By the end of the course, developers are equipped to use test-driven techniques and proven software processes to create high-quality software with a minimal change in overall effort.	3	17-19		19-21			\$1195		
6215	Implementing and Administering Microsoft Visual Studio 2008 Team Foundation Server This two-day instructor-led course provides students with the knowledge and skills to implement and administer Microsoft Visual Studio 2008 Team Foundation Server. The course focuses on installation and configuration details, team projects, work items, version control, Team Build, and reporting.	2	20-21		22-23			\$795		
6460	Visual Studio 2008: Windows Presentation Foundation This three-day instructor-led course provides students with the knowledge and skills to build and configure a Windows Presentation Foundation (WPF) solution. This course is intended for application developers who know how to build Windows Forms applications, custom user controls in .NET 2.0 and how to use the common features of the base class library. They do not have to understand concepts such as advanced UI threading and asynchronous programming, building custom controls from scratch or using GDI. They also do not need experience building Visual Studio addins or custom designers.	3	3-5		5-7			\$1195		
6461	Visual Studio 2008: Windows Communication Foundation Provides students with the skills to build and configure a Windows Communication Foundation (WCF) solution. Intended for application developers who know how to build Web services in .NET 2.0 and how to use the common features of the base class library. The application developers do not have to understand concepts such as advanced WS-*, WSE, lifecycle management, and diagnostics.	3		14-16		9-11		\$1195		
6462	Windows WorkFlow Foundation This two-day instructor-led course provides students with the knowledge and skills to build and configure a Windows Workflow Foundation (WF) solution. This course is intended for application developers who know how to create applications in Visual Studio 2005 or 2008. The course does not require previous experience creating workflow-based solutions.	2		17-18		12-13		\$795		
6463	Visual Studio 2008: ASP.NET 3.5 This two-day instructor-led course provides students with the knowledge and skills to create a fully functional Web application by using ASP.NET 3.5. This course is intended for application developers who know how to create applications in Visual Studio 2005 or 2008.	2		8-9		23-24		\$795		
6464	Visual Studio 2008: ADO.NET 3.5 This two-day instructor-led course provides students with the knowledge and skills to access and modify data by using ADO.NET 3.5. This course is intended for application developers who know how to create applications in Visual Studio 2005 or 2008.	2		10-11			21-23	\$795

ID	Visual Studio 2005	Days	Aug	Sept	Oct	Nov	Dec	Price	Prereq	Exam(s)
2541	Core Data Access with MS Visual Studio 2005 Workshop provides students with the knowledge and skills to develop data-access applications by using the Microsoft .NET Framework and Visual Studio 2005. The workshop describes how to access and update data in a database by using ADO.NET. and describes how to create, read, and write XML data.	3	31 – Sept 2			2-4		\$1195		70-526 70-552
2542	Advanced Data Access with MS Visual Studio 2005 Provides students with the knowledge and skills needed to use advanced data access features and techniques in the Microsoft .NET Framework and Microsoft Visual Studio 2005. The workshop describes how to access data and how to implement database functionality by using Microsoft ADO.NET 2.0 and Microsoft SQL Server 2005. The workshop also describes how to locate, edit, and transform XML by using XPath and Extensible Style sheet Language for Transformations (XSLT).	2		3-4		5-6		\$795	2541	70-526 70-552
2543	Core Web Application Technologies with MS Visual Studio 2005 Workshop provides students with the knowledge and skills to develop Microsoft ASP.NET 2.0 Web applications using Microsoft Visual Studio 2005. The workshop focuses on user interfaces, Web site structure and functionality, and implementation details.	3		14-16		16-18		\$1195		
2544	Advanced Web Application Technologies with MS Visual Studio 2005 Workshop provides students with the knowledge and skills to develop Microsoft ASP.NET 2.0 Web applications using Microsoft Visual Studio 2005. The workshop focuses on advanced user interfaces, Web site functionality, and implementation details using the advanced features of ASP.NET 2.0 and Visual Studio 2005.	2		17-18		19-20		\$795	2543	
2546	Core Windows Forms Technologies with MS Visual Studio 2005 Workshop provides students with the knowledge and skills to develop Microsoft Windows Forms applications using Microsoft Visual Studio 2005. The workshop focuses on user interfaces, program structure, and implementation details.	3	10-12		26-28			\$1195		70-526 70-552
2547	Advanced Windows Forms Technologies with MS Visual Studio 2005 Workshop provides students with the knowledge and skills to develop advanced Microsoft Windows Forms applications using Microsoft Visual Studio 2005. The workshop focuses on user interfaces, program structure, and implementation details.	2	13-14		29-30			\$795	2546	70-526 70-552
4994	Introduction to Programming the MS .NET Framework w/ VS 2K5 This five-day instructor-led course enables introductory-level developers who are not familiar with the Microsoft .NET Framework or Microsoft Visual Studio 2005 to gain familiarity with the Visual Studio 2005 development environment. Students will also learn basic skills using either Microsoft Visual Basic or Microsoft Visual C# as a programming language.	5		21-25		30 – Dec 4		\$1995		
4995	Programming w/ MS .NET Framework Using VS 2K5 This five-day instructor-led course enables developers who are migrating from a different development language, an earlier version of Visual Basic .NET or Visual C#, or who have completed entry-level training and experience using Microsoft Visual Studio 2005, to gain in-depth guidance on programming the Microsoft .NET Framework versions 2.0 and 3.0 with Visual Studio 2005.	5		28 – Oct 2			7-11	\$1995

5060	Implementing Windows SharePoint Services 3.0 Provides students with the knowledge and skills to successfully implement Windows SharePoint Services (WSS) version 3.0 in their organizations. It emphasizes that students should think about the architecture of their entire environment, including business and application needs, during the planning and deployment phases. The course covers how to perform a clean installation of WSS 3.0 and also describes all the prerequisites required to select the most appropriate method for upgrading WSS from 2.0 to 3.0 in a specific scenario. In addition, the course focuses on how to manage WSS after it is configured.	2	3-4		12-13		14-15	\$795		
5061	Implementing Microsoft Office SharePoint Server 2007 Provides students with the knowledge and skills required to implement Microsoft Office SharePoint Server 2007 successfully in their organization.	3	5-7		14-16		16-18	\$1195		
50026	SharePoint 2007 Hands-On Labs This series of 33 hands-on labs allows students to explore the new features of Microsoft SharePoint Server 2007, Microsoft Windows SharePoint Services 3.0, Microsoft Office 2007, including Microsoft Office Groove 2007, and Microsoft Windows PowerShell.	1			26		21	\$395		
50047	Advanced IT Pro Course for SharePoint Server 2007 and SharePoint Services 3.0 This course provides students with the knowledge and skills to plan, deploy, and configure server farm solutions with Microsoft Office SharePoint Server 2007 and Windows SharePoint Services 3.0. This course focuses on key deployment and configuration tasks.	5		28 – Oct 2		16-20		\$1995		
50048	Architect and Plan the Search Capability in Microsoft Office SharePoint Server 2007 This workshop provides students with the knowledge and skills to architect enterprise search solutions with Microsoft Office SharePoint Server 2007. The workshop focuses on architectural issues and decisions.	2			27-28		22-23	\$795		
ID	Exchange Server 2007	Days	Aug	Sept	Oct	Nov	Dec	Price	Prereq	Exam(s)
3938	Updating your Skills from MS Exchange Server 2000 or 2003 to Microsoft Exchange Server 2007 This course will provide Exchange administrators with the skills needed to manage a Microsoft Exchange Server 2007 infrastructure. This course focuses on the new features and administrative tasks in Exchange 2007. The student will learn skills that enable them to deploy and manage an Exchange Server 2007 environment. This course is not intended to provide detailed design skills, but will cover planning skills at a level sufficient to enable decision making for the implementation process.	3	24-26			30 – Dec 2		\$1195		
5047	Introduction to Installing & Managing MS Exchange 2007 Teaches students who are new to Exchange Server how to configure and manage a messaging environment in accordance with technical requirements. Students will learn how to install Exchange Server 2007 and manage routing, client access, and the backup and restore of databases. They will also learn how to manage addressing and recipient objects such as mailboxes, distribution groups, and contacts.	3			5-7		7-9	\$1195		
5049	Manage Message Security Using MS Exchange 2007 Provides messaging specialists with the knowledge and skills to manage messaging security and policies. Learn how to manage messaging and connection security. They will also learn how to manage spam, anti-virus, and content filtering. And finally they will learn how to install and configure a gateway	1			8		10	\$395
